

Application No.: 10/731,530

Docket No.: JCLA10474

REMARKS**Present Status of the Application**

It is noted with great appreciation the indication of allowable subject matter in claims 1-20 by the Examiner, and that claim 1 would be allowable if amended to overcome the rejections under 35 U.S.C. 112, second paragraph.

In response thereto, Applicants have amended independent claim 1 and newly added claim 21 according to paragraph [0045]. It is believed that no new matter adds by way of amendments to claims or otherwise to the application.

Response to Claims Rejections under 35 USC§112

Claim 1 under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In rejecting claim 1, the term "poorly adhesive layer" is a relative term, so Applicants amend it into "metal layer" which cannot render the claim indefinite.

In response thereto, Applicants would like to thank the Examiner for pointing out the informalities, and accordingly, amended claim 1 as above. After entry of the above amendments to the claims, it is believed that the above rejections can be overcome. Reconsideration is respectfully requested.

Application No.: 10/731,530

Docket No.: JCLA10474

Newly Added Claims

Claim 21 is newly added and supported by the description in paragraph [0045], whereby limiting the material of the "metal layer" in amended claim 1.

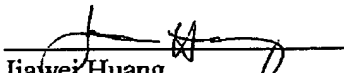

CONCLUSION

For at least the foregoing reasons, it is believed that all the pending claims 1-21 of the present application patently define over the prior art and are in proper condition for allowance. If the Examiner believes that a telephone conference would expedite the examination of the above-identified patent application, the Examiner is invited to call the undersigned.
